Record Employment and Wages in Fiscal 1965

Reflecting a sure and steady economic growth, insured employment and wages in Montana pushed to new record levels during the Fiscal Year 1965. Healthy employment trends were established early in this year and carried through the entire year. Statewide there was an average of 16,143 employers subject to the UCC law, up 100 from Fiscal 1964. They paid wages to an average of 115,124 insured workers. All figures and references contained in this publication apply only to employers, workers, and wages covered under the unemployment insurance law in Montana. Excluded is employment in interstate railroads, government, agriculture, and certain charitable and non-profit establishments.

Wage Totals Up \$27.2 Million

With all but one of the seven major industry groups subject to UCC coverage reporting more wages paid in Fiscal 1965, insured wage payments increased by \$27.2 million to a record setting total of \$564.5 million. The increase in insured wages over the last ten years was \$128 million.

Trade Wages Up \$8.5 Million

Wages in trade industries were up \$8.5 million to a total of \$171.9 million for the largest single increase in any industry over Fiscal 1964. The opening of new super markets and shopping malls throughout the state in Fiscal 1965 accounts for a good portion of this gain. Next in order of wage gains over Fiscal 1964 were: manufacturing, up \$6.6 million to \$128.7 million; mining, up \$3.8 million to \$49 million; service industries, up \$3.6 million to \$49.6 million; transportation, communications and utilities, up \$3.3 million to \$57.4 million; and finance, insurance and real estate, up \$1.6 million to \$32.5 million. The only decline was in contract con-

struction where wages totaled \$75 million after a drop of \$360,000 from Fiscal 1964.

35 Counties Exceed Last Year

Thirty-five of Montana's 56 counties had higher insured wage totals than in Fiscal 1964. The biggest gain was in Cascade County where a \$5.2 million increase brought total wages to \$72.4 million. Missoula County was in the second spot with a gain of \$4 million for a total of \$48.1 million. Flathead County was up \$2.5 million to \$28.6 million. Although insured wages in Yellowstone County, at \$80 million, were highest for any county in the state, the increase over Fiscal 1964 was \$2.4 million. The gain in Silver Bow County was \$2.1 million for a total of \$56 million. Three counties, Glacier, Lewis and Clark, and Lincoln each showed increases of over \$1 million during Fiscal 1965.

Average Yearly Earnings Advance

Average yearly earnings per employee were up in all major industry groups during Fiscal 1965. The average yearly wage for all covered industries, ranging from a high of \$6,578 in the mining industry to a low of \$3,177 in service and miscellaneous industries, was \$4,903. This was a gain of \$114.00 over Fiscal 1964. Average yearly earnings in manufacturing showed the most increase, up \$296, followed by mining, up \$264, and transportation, communications and utilities, up \$235.

County Wage Averages Vary

Average wages in covered employment by county show differences which reflect the nature of the economy in each area. Average wages in a predominately rural county are naturally lower when measured against one with a complex of industry.

(3) Statewide employers are those whose operations are not ascribed to an individual county. This includes firms with units or operations organized on a multi-county pattern and reporting as a single enterprise. Also included are some employers whose base operations shift from one location to another, such as construction contractors. Wages and employment of such concerns represent approximately 16.8 percent of the state total. In a factual sense this category affects the employment economy of all Montana counties, proportionately to such factors as their population, commercial and industrial pattern, utilities represented, and volume of construction.

(4) Does not include employers who did not have employees during fiscal year. Employers are carried on Commission records until "none" reports have been received for two years.

County Wage Averages

Average earnings are derived from gross wages reported, divided by average number of employees on covered payrolls. Comparative figures for fiscal 1965 and 1964 are hereby arrayed, by county:
